About Date of Onsite Events of 2023 Formula SAE Japan (Official Announcement No. 1)

Date of Onsite Events of 2023 Formula SAE Japan has been announced as the Official Announcement No. 1. Due to the circumstance of the venue, the schedule has been changed from early September to late August. We apologize for the change after the Participation Rules were announced.

Due to the above, the previously announced deadline for submission has been changed. Specifically, there are the following three items.

- Shakedown Certificate
- Cost Event Addendum
- Real case scenarios

In the 2023 competition, submission deadlines were unified on Thursday, but to minimize the impact, the above three items have been changed to Monday.

Also, as a new attempt at the 2023 competition, only the EV class will have the EV Inspection starting on Monday, August 28. We are currently considering the details of reception on Monday, August 28, EV Inspection, the delivery date and time of overseas teams.

Thank you.
